1) In the abstract, last line, " , " is deleted and - - . - - is inserted therefor.

2. The following is an examiner's statement of reasons for allowance: The closest prior arts are US 2002/0151534 and WO 01/56989. US'534 claim 1, page 26-27; teach structurally similar compounds, composition and method claim as claimed herein. Note m can be 0, n can be 1, R4 can be hydrogen, A can be substituted methylene, Ar can be phenyl substituted with amidino similar to herein. However, the definition of A differs from herein claimed compounds, and there is no motivation to have substituents as claimed herein using the prior art reference. WO' 989, claim 1, page 50-54 teach broad genus which can be structurally similar to those claimed herein. Especially see compounds on pages 27-33, wherein R11 can be C(=O)-NH<sub>2</sub>, E-J can be phenyl, G can be guanidine. However, (CH<sub>2</sub>) is unsubstituted in the reference as against always substituted in herein. There is no motivation to arrive at the claimed compound using the prior art alone or in combination, and hence instant claims are patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
